

Have your show filmed, edited live whilst it's happening, streamed live and/or recorded, uploaded and archived - all to professional, broadcast standards.

At Studio Holder, we pride ourselves on being able to deliver outstanding results with minimal fuss. We are delighted to bring affordable, portable and broadcast-quality live-streaming & recording services to both freelance creatives & arts organisations, see below for more details on what the service entails.

Who/What Is The Service Suitable For

- *Local Musicians & Bands, Performers, Actors, Comedians, Theatre Troupes, Artists, TV Presenters, Lecturers, Workshop Facilitators, Panellists, Students, and more...*
- The idea is to make documenting your show/event as hassle-free, simple and high-quality as possible.
- We provide years of experience in live production & post-production across Film, TV & Theatre and bring that, and equipment that does the job: to you, your team and audience.

How It Works

- We arrive at your venue with the equipment, have a chat about where is good to set-up the kit (4-way extension lead for power supply + stable internet connection/access to internet router + table/chair and some space is a must-have). Technical Rehearsals in-advance are suggested.
- We run a short A/V check (if there's time and availability) to make sure both parties are happy with how everything's running.
- The gig/event/function happens - we record/stream the event (using multiple cameras + audio) to your audience/followers online - or we just record it and upload the full file to you after the event.
- You're free to do as you wish with the recording, as you've paid for the service - and it's all yours. We do keep copies for a short time, in case there's an issue, but it is the customer's responsibility to keep their recordings.
- If you wish to re-edit the programme yourselves after the show is over or require additional filmed material for perhaps additional content you intend to make, or for your own archive, then for an additional charge* we can also supply the individual recordings/sound files from each camera.

The packages are in two models, **Simple** (for stand-up shows, pub theatres, presentations and lectures) and **Advanced** (for multi-actor, medium-to-large scale productions, large concert halls/venues). The pricing included in this leaflet is for the Simple package alone to make it easy to understand. For Advanced Package pricing, please enquire within. In addition to these packages, we can also tailor a specific package / workflow to suit your needs. For any further info, email louishb@gmail.com

Master & ISO Files uploaded are MP4 (H.264-encoded), for any other flavour of file required such as **DVD, Blu-Ray or QuickTime ProRes**, We can make that for you + send it your way for an additional small fee.

Simple Package
